RunbookPilot

PRODUCTS, SERVICES & PRICING CATALOG

Enterprise AI Education, Automated Runbooks & Infrastructure Suites

Commercial Catalog • Edition [2026]

Authorized & Published by:

Ashish, Founder & Owner

Comprehensive guide detailing our educational tiers, enterprise automation suites, modular API integrations, SLAs, and flexible commercial pricing models.

1. Product Portfolio & Ecosystem Overview

RunbookPilot offers a comprehensive AI learning and infrastructure automation ecosystem designed to help individuals, developers, and enterprises understand modern AI concepts, build real production systems, and execute automated operational runbooks.

Each module and learning resource can be deployed independently or combined into a structured, end-to-end engineering journey tailored for modern cloud-native organizations.

Core Ecosystem Pillars:

- **RunbookPilot Courses:** Structured AI engineering curricula from fundamentals to deployment.
- **RunbookPilot Projects:** End-to-end implementation codebases and realistic architecture blueprints.
- **RunbookPilot Tutorials:** In-depth technical articles, video walkthroughs, and code patterns.
- **RunbookPilot Automation Suite:** Enterprise AI runbooks and automated incident response workflows.

2. RunbookPilot Courses & Structured Learning

Our structured courses provide step-by-step learning paths covering modern AI engineering and infrastructure automation topics from basics to enterprise deployment.

- Generative AI and Large Language Model (LLM) application development.
- Advanced Retrieval-Augmented Generation (RAG) systems and hybrid vector search.
- Agentic AI, multi-agent coordination, and autonomous execution pipelines.
- LangChain, LangGraph, and modern orchestration framework mastery.
- Production APIs, evaluation frameworks, system observability, and CI/CD deployment.

3. RunbookPilot Projects & Implementation Blueprints

Project-based learning demonstrates how individual AI components work together inside complete, production-grade applications and operational workflows.

- Complete end-to-end source code repositories and system architecture diagrams.
- Vector database management, embedding pipelines, and caching layers.
- Autonomous agent workflows and tool integration scripts.
- FastAPI backend services, secure authentication, and user interfaces.
- Cloud containerization (Docker/Kubernetes) and production scaling guides.

4. Technical Tutorials & Knowledge Base

Focused technical tutorials explain important AI concepts, frameworks, tools, and engineering patterns through clear theory and practical code implementation.

- Concept-focused technical guides and architectural deep-dives.
- Step-by-step coding demonstrations and prompt engineering blueprints.
- Workflow optimization and infrastructure troubleshooting patterns.
- Production AI engineering best practices and security checklists.

5. RunbookPilot Community & Support Ecosystem

Our vibrant community supports continuous learning through technical discussions, practical resources, project guidance, and structured mentorship under Ashish's supervision.

- Learning-focused technical discussions and peer code reviews.
- Project roadmap guidance and career advancement pathways.
- Early access to new AI engineering tutorials, patches, and feature updates.
- Exclusive course announcements, community hackathons, and webinars.

6. Individual & Free Learning Pricing Tiers

RunbookPilot provides a healthy mix of free educational resources and premium structured learning experiences designed to fit every developer's budget and timeline.

Tier 1: Free Learning Access — $0 / Forever

Designed for learners who want to explore AI engineering concepts and practical implementations without upfront commitment:

- Access to public video tutorials and introductory code repositories.
- Selected project walkthroughs and architecture whitepapers.
- Community discussion forums and learning resource repositories.

Tier 2: Premium Courses & Modules — From $49 / Course

Best suited for learners seeking structured, in-depth, project-focused mastery:

- Complete structured course curriculum with lifetime video access.
- Hands-on coding labs, end-to-end project files, and solution notebooks.
- Production-oriented engineering patterns and completion certificate.

7. Enterprise Teams & Partnership Pricing

Tailored learning pathways, content licensing, and technical collaboration packages are available for organizations and engineering teams based on scope and requirements.

Tier 3: Enterprise Team License — Custom Annual Pricing

Designed for engineering organizations scaling internal AI capabilities:

- Unlimited team access to all premium courses and project codebases.
- Custom learning tracks tailored to specific corporate tech stacks.
- Dedicated Slack/Discord support channel with direct instructor access.

Tier 4: Enterprise Runbook Automation Suite — Contact for Quote

Comprehensive AI runbook execution and automated infrastructure tools:

- Custom automated runbook generation for cloud infrastructure.
- Advanced API quotas, dedicated server clusters, and custom connectors.
- Comprehensive security compliance packages and on-premise deployment options.

8. SLAs, API Quotas & Security Compliance

Enterprise engagements are governed by rigorous Service Level Agreements (SLAs), enterprise-grade security protocols, and dedicated technical support guarantees.

Service Level Agreements (SLAs)

- **Uptime Guarantee:** 99.9% platform availability for enterprise automated runbook endpoints.
- **Support Response Times:** Critical severity issues addressed within 2 business hours; standard tickets within 12 hours.
- **Maintenance Windows:** Scheduled updates performed during off-peak hours with advance notifications.

Security Compliance & API Quotas

- SOC2 Type II compliance readiness and encrypted data transmission (TLS 1.3).
- Custom API rate limits starting at 10,000 requests/minute, scalable upon request.
- Role-Based Access Control (RBAC) and single sign-on (SSO) via SAML/OAuth.

9. Billing, Payment Terms & Authorization

Course pricing, billing cycles, and enterprise subscriptions depend on the platform or commercial agreement selected. All terms adhere to international digital commerce regulations.

Billing & Payment Terms

- Individual courses and subscriptions are billed upfront via secure credit card or regional payment gateways.
- Enterprise team licenses and custom automation suites are billed annually via invoice with Net-30 payment terms.
- Refunds for digital courses are available within 7 days of purchase, provided less than 20% of the content has been accessed.
- Taxes (GST/VAT) are applied automatically based on the user's billing jurisdiction and local statutory laws.
